Inventions that Shape the Martian Frontier

One day, Thomas Edison came home and gave a paper to his mother. He told her, "My teacher gave this paper to me and told me to only give it to my mother." His mother's eyes were tearful as she read the letter out loud to her child: "Your son is a genius. This school is too small for him and doesn't have enough good teachers to teach him. Please teach him at home." Many years after Edison's mother died and he was now one of the greatest inventors of the century, One day he was looking through old family things. Suddenly he saw a folded paper in the corner of a drawer in the desk. He took it and opened it up. On the paper was written: "Your son is addled [mentally ill]. We can't let him continue to school anymore." Edison cried for hours and then he wrote in his diary, "Thomas Alva Edison was an addled child that, by a hero mother, became the genius of the century."
